

Physicians are busy. Probably an understatement but an important detail when trying to bring them together. A physician's life is a balance between promoting our patients' physical and mental health without hurting our own. Home life and work life leave little room for things like social media. So in order to bring physicians together online, one must offer a practical service in addition to the fun stuff.

3D VisionSoft is developing *IllumiDoc* to address these needs. Through medical media sharing, note-taking, continuing medical education, consultation, and more, we provide the physician with online tools that improve his or her daily practice. A physician can log on with little fear of interrupting work flow. By doing this, IllumiDoc provides a kind of online base station from which physicians can reach out to other physicians both clinically and socially. Working and living on IllumiDoc does not fill the physicians day up with more stuff. It helps them streamline their time by providing easy access to information while still allowing them to be the social people that they are. In addition, because IllumiDoc is more about sharing and education and less about promoting and advertising, networking is not limited to a particular branch of medicine or a geographical/political boundary. One can share images and consult with physicians around the globe and within any specialty.

IllumiDoc is the answer to the busy physician who wants to integrate learning and networking with his or her daily practice. Dr. Byron Fergerson is the inventor of the concept of IllumiDoc and working with 3D VisionSoft to bring to reality.

dxSuite facilitates study, collaboration, CME testing, teaching with visual tools and content. Primary content are images and videos organized in a fascicle manner so as to present timely material to the clinical audience for comments and reviews. Diagnostic Suite is different from YouTube because it has more vetted material that is uploaded by credentialed professionals and less to do with either non-professional or reviewed material or material that is commercial or promotional in nature. Diagnostic Suite provides a place for physicians to grow clinically, stay educated and certified with CME studies and tests, and to share content with others. Material needs to be completely HIPAA compliant with tools during the upload process to scrub patient identification information.

HippoNotes is a medical EverNote. Use portable devices such as iPhones or iPads to create notes on the fly and to store them in various folders with identifying tags. This would be physician or clinician driven, search through a set of keywords for organization. Hippocratic Notes are "visual notes in your back pocket". Online flashcards can be generated from Hippocratic Notes on domain-based templates (i.e., anesthesiology, case reports, etc).

MedPoint provides physicians with a platform for creating their own conferences. The content can be used for CME credits).

iConsult is an immediate data and information query and delivery system for use by clinicians in real or near-real time, Modeled against Twitter so that questions can be asked online that others might answer.

Components

- dxSuite
- HippoNotes
- MedPoint
- iConsult

Features

- Online tools for the physician to improve his practice
- Reach out to other physicians both clinically and socially
- Streamline your time by providing easy access to information
- More about sharing and education and less about promoting and advertising
- Open to all branches of medicine
- Not confined by geographical or political boundaries

Our Company

3D VisionSoft provides customized solutions in software for a variety of applications. We work for both clients as well as develop solutions that we think are needed in our complicated world. The applications that we choose are those that we view as having a strong impact factor, or sometimes just cool to have. Whether it's for a client or for us, we follow the basic principles set forth below.

Philosophy

The goal of 3D VisionSoft is to integrate various forms of technologies stemming from computer information services and custom software development to the basic science and medical fields. The company's values are based on strong working relationships with the clients, developing a level of communication, understanding, and interaction that engenders trust, integrity, and honesty. Projects are chosen that can make an impact on life in general by improving the quality of scientific and medical research.

Value Proposition

3D VisionSoft works with each client to understand his or her needs and concerns before taking on a project. The quality of the team interaction and the technology and software end product is the most important goal. We will efficiently evaluate client business requirements before recommending a software design solution. We will develop custom software and perform the software integration if necessary.

Business Opportunities

3D VisionSoft also considers opportunities with novel and important applications in biotechnology and medical instrumentation and brokers deals with the investment community and the entrepreneurs.

Our Team

Our team consists of professionals who share a common goal of fostering a future generation of software intelligence. We are a family of like minded innovators, scientists, clinicians, engineers and experienced businessman focused on developing pragmatic products.

Client side (IOS iPhone, Android phone, IOS iPad, Apple, Windows, Linux), proof of concept modeling and 3D CAD/CAM modeling services are all performed in San Diego, CA, USA. Server side, algorithmic design and mathematical research, specifically in image processing, are carried out in Pune, India. The offices in Perth, Australia liaise with the business and investment arms, and also manage most of the clinical testing for medical applications.

Building Products

At 3D VisionSoft, we can design/create full applications, either for internal use by you or your end user customers, or as actual commercial software products. Our product engineering encompasses the entire product development cycle from conceptualization to maturity. Proof of concepts help you visualize your product and test its basic premises. The development phase focuses on meeting your individual needs to be the best in class. We can bring value to your product by reducing the product release cycles, controlling costs and enabling market leadership through quality and innovation. In addition to the product, we can provide full documentation, technical guidance, and training if needed.

Providing Services

At 3D VisionSoft, you can relax by working with us and letting us pull together our resources to help you support your investment in your business and succeed. We will do what it takes to establish and nurture a long-term relationship with you and work side-by-side with you before and after our working relationship so that you can continuously reap the benefits of our solutions.
