

With No-Q Systems Pty Ltd., based in Lathlain, Australia, 3D VisionSoft is developing groundbreaking technology to address the bottlenecks in patient scheduling in the modern medical office. Millions of patients are seen each year by health service providers. Private Waiting Room (PWR™) works with the medical office to provide freedom for these patients during the waiting period before seeing the health service provider. 3D VisionSoft believes that this will optimize patient waiting times, reduce patient exposure to viruses and other pathogens, increase efficiency and patient management, and to increase the medical clinic customer appeal and staff satisfaction in the medical clinics' waiting rooms. The patients are free to leave the waiting room and go elsewhere while periodic reminders are sent to them electronically. Changes in their schedules are immediately transmitted to the patients so that schedules overall at the clinic can be optimized for faster patient throughput. This means shorter wait times, better management of the provider's time, and overall higher quality service.

3D VisionSoft is developing PWR™ as an automated patient/client notification system. PWR™ is comprised of a standalone software client application interacting with a commercial SMS server system. PWR™ is used by the office worker who is checking in the patient and enters in basic patient demographics information. Alternatively, PWR™ can receive HL7 standards-based patient demographics data automatically from an HL7 compliant office patient scheduling software. This information is used to create outbound reminder messages that are transmitted to the patient automatically at the proper intervals.

## Benefits for the Clinic Manager

- Enables each doctor's waiting list to be managed independently but still coordinated by a single practice management system.
- Patient is notified automatically of a change in schedule.
- The clinic and its patient flow is enabled with increases in efficiency and a reduction in the stress and failed-to-attend rates.
- Reduces the number of patients in the waiting room with a potential to free up waiting room space and to change the waiting room design.

## Benefits for the Patients

- Avoid exposure to other (sick) patients for prolonged periods of time.
- Receive automatic updates on wait times.
  - The opportunity to wait in a quiet surrounding of their choice
  - Manage waiting time productively
- Mothers with new babies and toddlers are able to devote attention to a sick child or to feed and change babies away from the waiting area.

13223 Black Mountain Rd, Ste 1-224, San Diego CA 92129 USA

## Advantages

- Addresses an unmet need in local clinic and larger hospital patient management systems
- Operates as an add-on enabling system
- Assists with the management of pandemic viruses, e.g., H1N1, bird flu, SARS, and emerging diseases
- Mitigates the day-to-day virus transmission between different cohorts of the community:
  - baby
  - infant
  - preschoolers
  - teenagers
  - young adults
  - the aged

## Effective Waiting Rooms

- Minimize hard costs of space and seating capacity
- Minimize inter-patient viral transmission
- Improve productivity of office manager and reduces stress of managing a crowded waiting room
- Drives other organizational improvements, productivity, and efficiencies
- Increases patient satisfaction, and heightens staff morale, thus reducing stress

## Our Company

3D VisionSoft provides customized solutions in software for a variety of applications. We work for both clients as well as develop solutions that we think are needed in our complicated world. The applications that we choose are those that we view as having a strong impact factor, or sometimes just cool to have. Whether it's for a client or for us, we follow the basic principles set forth below.

### *Philosophy*

The goal of 3D VisionSoft is to integrate various forms of technologies stemming from computer information services and custom software development to the basic science and medical fields. The company's values are based on strong working relationships with the clients, developing a level of communication, understanding, and interaction that engenders trust, integrity, and honesty. Projects are chosen that can make an impact on life in general by improving the quality of scientific and medical research.

### *Value Proposition*

3D VisionSoft works with each client to understand his or her needs and concerns before taking on a project. The quality of the team interaction and the technology and software end product is the most important goal. We will efficiently evaluate client business requirements before recommending a software design solution. We will develop custom software and perform the software integration if necessary.

### *Business Opportunities*

3D VisionSoft also considers opportunities with novel and important applications in biotechnology and medical instrumentation and brokers deals with the investment community and the entrepreneurs.

## Our Team

Our team consists of professionals who share a common goal of fostering a future generation of software intelligence. We are a family of like minded innovators, scientists, clinicians, engineers and experienced businessman focused on developing pragmatic products.

Client side (IOS iPhone, Android phone, IOS iPad, Apple, Windows, Linux), proof of concept modeling and 3D CAD/CAM modeling services are all performed in San Diego, CA, USA. Server side, algorithmic design and mathematical research, specifically in image processing, are carried out in Pune, India. The offices in Perth, Australia liaise with the business and investment arms, and also manage most of the clinical testing for medical applications.

## Building Products

At 3D VisionSoft, we can design/create full applications, either for internal use by you or your end user customers, or as actual commercial software products. Our product engineering encompasses the entire product development cycle from conceptualization to maturity. Proof of concepts help you visualize your product and test its basic premises. The development phase focuses on meeting your individual needs to be the best in class. We can bring value to your product by reducing the product release cycles, controlling costs and enabling market leadership through quality and innovation. In addition to the product, we can provide full documentation, technical guidance, and training if needed.

## Providing Services

At 3D VisionSoft, you can relax by working with us and letting us pull together our resources to help you support your investment in your business and succeed. We will do what it takes to establish and nurture a long-term relationship with you and work side-by-side with you before and after our working relationship so that you can continuously reap the benefits of our solutions.
